PROFILE

I'm an undergraduate student at KL University, pursuing a degree in Computer Science Engineering with a specialization in Artificial Intelligence and Intelligent Process Automation. I have a strong passion for researching cutting-edge technologies and developing innovative solutions. Challenges excite me, and I always strive to stay updated with the latest advancements in the tech industry. My commitment to continuous learning drives both my personal and professional growth. Alongside my academic journey, I've honed my skills in Java, SQL, and Python programming. I'm eager to explore projects, internships, and other opportunities that will help me expand my knowledge and expertise in the field.

CERTIFICATES

- Red Hat Certified Enterprise Application Developer ⊡
- AWS Certified Cloud Practitioner ⊡
- Salesforce Certified AI Associate ⊡

PROGRAMMING SKILLS

PROJECTS

Enable users to find and hire the right professional for their needs ⊡
Design a web application that seamlessly connects users with professionals across various services. The platform should offer job search functionality, detailed provider profiles, and an easy way for users to find and hire the right professional for their needs.
- **Admin:** Oversee platform settings, manage user roles, and handle service listings.
- **Professional:** Create and maintain profiles, showcase services, and communicate with clients.
- **User:** Search for professionals, book services, and share feedback.
- **Customer Support:** Assist users with inquiries, resolve issues, and ensure a smooth and hassle-free experience.

EVENT MANAGEMENT SYSTEM ⬈

The Event Management System (EMS) is a web-based platform that simplifies event planning by automating registrations, logistics, and communication. Whether it's a conference, wedding, or corporate event, EMS streamlines coordination and enhances collaboration for a smooth experience. This all-in-one tool helps organizers with tasks like ticketing, scheduling, marketing, and payment processing. It's perfect for managing events of all sizes, from music concerts and festivals to trade shows and professional meetings. With EMS, planning becomes more efficient, organized, and stress-free.

TIC-TAC-TOE GAME ⬈

This Pygame-powered Tic-Tac-Toe features a sleek UI with smooth animations. Players take turns placing Xs and Os on a 3x3 grid, with automatic win/tie detection and a winning line display. A restart button allows for quick resets, keeping the game running seamlessly.
